sum.java

```
1 import java.util.Scanner;
2
3 public class sum {
4     public static void main(String args[]){
5         int num1,num2,num3,result;
6         System.out.println("Enter any 3 integers ");
7         Scanner in = new Scanner(System.in);
8         num1 = in.nextInt();
9         num2 = in.nextInt();
10        num3 = in.nextInt();
11        result=num1+num2+num3;
12        System.out.println("The result after addition is "+result);
13    }
14 }
15
```

Run: sum

Enter any 3 integers

12

14

15

The result after addition is 41

Process finished with exit code 0
